

赤峰华恒合成生物科技有限公司

CHIFENG HUAHENG SYNTHETIC BIOTECHNOLOGY CO., LTD

Safety Data Sheet

Product name: L-Arginine

Revision Date: 8/11/2023

1. Chemical and corporate identification

Chinese name of chemical: L-arginine

Chemical name: L-Arginine

Company name: Chifeng Huaheng Synthetic Biotechnology Co., LTD

Add: No. 313 Fujin Road, Tianyi Town, Ningcheng County, Chifeng City, Inner Mongolia Autonomous Region

Zip Code: 024200

E-mail address: ahb@ehuaheng.com

Emergency telephone: 04765664666

Recommended and restricted use: feed additive

2. Hazards identification

Risk category: No data available

GHS Hazard category: No hazard category

Tag elements:

Pictograph: no danger icon

Warning word: No warning word

Precautions:

Preventive measures: None

Response: None

Safe storage: None

Waste disposal: None

Physical and chemical hazards: No data available

Health hazards: No data available

Environmental hazards: No data available

3. Composition/composition information

Name: L-Arginine

Molecular formula: $C_6H_{14}N_4O_2$

Molecular weight: 174.201

Constituent	Content (%)	CAS number
L-Arginine	≥98	74-79-3

4. First aid measure

Inhalation: Move the victim to fresh air to keep breathing clear. Call emergency services if stop breathing.

Eye contact: Wash with water for at least 15 minutes. If wear contact lenses, remove them before rinsing them. Please move the patient to an air vent.

Skin contact: Immediately remove all contaminated clothing and wash gently with plenty of soap and water.

Skin irritation: Remove contaminated clothing, wash, and seek medical attention.

First aid protection: First responders need to wear personal protective equipment, such as rubber gloves and airtight goggles.

5. Fire protection measures

Extinguishing agent: Dry powder, foam, water mist, carbon dioxide

Fire precautions and protective measures:

Specific method: Fire from the upper wind, according to the surrounding environment to choose the appropriate fire extinguishing method.

Avoid using direct running water to extinguish the fire, which may cause splashing of flammable liquid and spread the fire.

Fire personnel should wear air breathing apparatus, wear full fire clothing, and fight fire upwind.

If possible, move the container from the fire to an open area.

Containers in the fire area must be evacuated immediately if they are discolored or emit sound from the safety relief device.

Isolate the accident site and prohibit irrelevant personnel from entering.

Contain and treat fire water to prevent environmental pollution.

6. Leak emergency treatment

Protective measures for operators, protective equipment and emergency procedures:

It is recommended that emergency personnel wear air breathing apparatus, anti-static clothes, and rubber oil-resistant gloves.

Environmental pollution prevention: do not discharge into the drainage ditch/surface water system/underground water system.

Cleaning or collection method:

Sweep or remove and seal into airtight containers. Be careful not to scatter.

Attachments or collections shall be disposed of immediately in accordance with appropriate laws and regulations.

7. Operational handling and storage

Operation disposal:

Handle in a well-ventilated place. Wear appropriate protective gear. Prevent dust diffusion. Wash hands thoroughly after handling.

Note: If dust or aerosols are produced, use local exhaust.

Handling precautions: Avoid contact with skin, eyes and clothing.

Storage:

Storage conditions: Keep the container airtight and store in a cool and dry place.

Stay away from heat and fire sources, and from incompatible materials such as oxidants.

8. Contact control/Personal protection

Occupational exposure limit: No data available

Biological limits: No data available

Personal Protective Equipment:

Engineering control: as far as possible to install a closed system or local exhaust system, the operator should not contact directly; Both shower and eye wash are

installed.

Respiratory protection: dust mask.

Hand protection: Protective gloves.

Eye protection: Safety goggles. Wear a mask if the situation requires it.

Skin and body protection: Protective clothing. Wear protective boots if the situation requires it.

9. Physicochemical properties

Properties: White crystal or white crystalline powder

Color: White

Odor: No data

Explosion limit [% (volume fraction)] : No data available

Flash point (°C) : 176.1±30.7 °C

Density: 1.5± 0.1g /cm³

PH value: No data

Melting point: 226°C

Boiling point: 367.6±52.0 °C at 760 mmHg

Solubility: partially soluble in cold water. Slightly soluble in methanol, acetone.

10. Stability and reactivity

Stability:

The product is stable when stored and used at normal ambient temperature.

Dangerous reactions:

No data available.

Substances to avoid contact:

No data available.

Dangerous breakdown products:

Hazardous breakdown products: No data available.

11. Toxicological information

Acute toxicity:

Slight danger if swallowed or inhaled.

Skin irritation or corrosion: No data available.

Eye irritation or corrosion: No data available.

Respiratory or skin allergies: No data available.

Germ cell mutation: No data available.

Carcinogenicity: No data available.

IARC: No data available.

Specific target organ system toxicity - one exposure: No data available.

Specific target organ system toxicity - repeated exposure: No data available.

12. Ecological information

Ecotoxicity:

Acute toxicity test of fish: No data available.

Daphnia acute activity inhibition test: No data available.

Algal growth inhibition test: No data available.

Toxicity to microorganisms: No data available.

Toxicity of biodegradation products: degradation products are more toxic.

Bioenrichment or bioaccumulation: No data available.

Migration in soils: No data available.

13. Waste disposal

Nature of waste: No data available.

Disposal method:

Relevant national and local regulations should be referred to before disposal. The waste exhibits one or more hazardous waste characteristics and should be treated and disposed of according to the requirements of national and local environmental protection authorities. We recommend that you contact the relevant agency or an approved waste disposal company who will advise you on how to dispose of your special waste.

Disposal precautions:

National and local regulations should be consulted before disposal.

See Section 8 for safety precautions for disposal personnel.

14. Transportation information

Dangerous Goods Number: No information available

Packing mark: No information available

UN Number: No data available

Package type: No information available

Transportation precautions:

Transport vehicles should be equipped with the appropriate variety and quantity of fire equipment and leakage emergency treatment equipment.

It is strictly prohibited to mix with oxidants and edible chemicals.

The exhaust pipe of the vehicle carrying the article must be equipped with a fire retarder.

When the tank (tank) truck is used for transportation, there should be a grounding chain, and a hole partition can be provided in the tank to reduce static electricity generated by shock. It is prohibited to use mechanical equipment and tools that are prone to spark.

It is best to transport early and early in summer.

During transportation, it should be protected from sun exposure, rain and high temperature.

Stay away from fire, heat source and high temperature area during stopover.

Road transport should follow the prescribed route, do not stay in residential areas and densely populated areas.

It is forbidden to slip them in railway transportation.

15. Regulatory information

The following laws, regulations, rules and standards shall make corresponding provisions for the management of the chemical:

Occupational Disease Prevention Law of the People's Republic of China:

Classification of occupational hazard factors: not included

Regulations on the Safety Management of hazardous Chemicals:

Hazardous Chemicals List: Not included

List of explosive hazardous chemicals: not included

List of hazardous chemicals under key supervision:

List of the first and second batch of hazardous chemicals under key supervision:
not included

Measures for the Environmental Management Registration of hazardous Chemicals (trial) :

List of key hazardous chemicals for environmental management: not included

Regulations on the Control of Narcotic Drugs and psychotropic Substances:

List of narcotic drug varieties: not included

List of psychotropic drugs: not included

16. Other information

Disclaimer:

This safety technical manual is made according to the General Rules of Chemical Classification and Risk Publicity. This product must comply with the "Cosmetic Hygiene Code" standards. This product must comply with the Feed and Feed Additives Administration Regulations and the Food Safety Law of the People's Republic of China.

The information in this SDS applies only to the specified product and, unless otherwise specified, does not apply to mixtures of this product with other substances. This SDS is intended to provide information on product safety only to appropriately trained users of the product. The user of this SDS shall make an independent judgment as to the suitability of the SDS. The author of this SDS shall not be liable for any injuries resulting from the use of this SDS.
