

MATERIAL SAFETY DATA SHEET

Ascorbyl Palmitate

1. Product Identification and Use

Product name	Ascorbyl Palmitate
Company information	Manufacturer Jiangxi Tianxin Pharmaceutical Co., Ltd. Address: Leping Industrial Zone, Leping, Jiangxi 333300, China Tel/Fax: +86-798-6702928
Emergency telephone	+86-13651606360 Kyle Wang (王万源), Intl. Business Manager

2. Composition / Information on Ingredients

Characterization	Fat soluble derivative of vitamin C
Chemical name	6-Palmitoyl-L-ascorbic acid
Synonyms	Vitamin C palmitate 6-Hexadecanoyl-L(+)-ascorbic acid
CAS No.	137-66-6
EINECS No.	205-305-4
E-number	E 304
Molecular formula	$C_{22}H_{38}O_7$
Molecular weight	414.54 g/mol

Constitution

3. Hazards Identification

Most important hazards	Harmful to aquatic organism, may cause long-term adverse effects in the aquatic environment.
------------------------	--

4. First Aid Measures

Overexposure to

Eyes	Immediately flush thoroughly with water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Consult a physician.
------	---

Skin	Flush skin with soap and plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse.
------	--

In case of

Inhalation	Remove the casualty to fresh air and keep him/her calm.
Ingestion	Consult a physician.

Notes to physician	Never give anything by mouth to an unconscious person. If conscious and alert, rinse mouth with water. Consult a physician.
--------------------	---

Treat symptomatically and supportively.

5. Fire Fighting Measures

Suitable extinguishing media	Water spray jet, dry powder, carbon dioxide, or appropriate foam.
------------------------------	---

Protection of fire-fighters	Precipitate gases / vapors / mists with water spray
-----------------------------	---

6. Accidental Release Measures

Environmental protection	Do not allow to enter drains or waterways.
--------------------------	--

Methods for cleaning up	Collect solids (avoid dust formation) and hand over to waste removal.
-------------------------	---

Clean contaminated areas with little ethanol.

7. Handling and Storage

Handling

Technical measures Processing in closed systems, superposed by inert gas (e.g. nitrogen).
 Local exhaust ventilation necessary.
 Take precautionary measures against electrostatic charging.
 Avoid dust formation, very high dust explosion hazard.

Suitable materials Stainless steel, aluminium, enamel, glass, polyethylene.
 When plastics are used, possible electrostatic charges must be considered.

Storage conditions Preserve in airtight containers, protected from light, preferably at 8 to 15 °C.
 Keep the container closed when not in use and away from incompatible substances.

8. Exposure Controls / Personal Protection

Engineering measures Refer to **Section 7**.

Personal protective equipment

Respiratory protection In case of open handling of larger quantities or accidental release: particle mask or respirator with independent air supply.

Hand protection Protective gloves.

Eye protection Safety glasses

9. Physical and Chemical Properties

Color White to yellowish

Physical state Powder

Odor Almost odorless

Solubility Insoluble in water, soluble in vegetable oils and ethanol.

Melting point 107~117 °C

Density 0.15 ~ 0.25 g/cm³ (bulk) 0.40 ~ 0.50 g/cm³ (tapped)

10. Stability and Reactivity

Conditions to avoid	Light, heat and humidity.
Materials to avoid	Strong oxidants

11. Toxicological Information

Toxicity data	LD ₅₀ > 20,000 mg/kg (oral, mouse) LD ₅₀ > 10,000 mg/kg (oral, rat)
Local effects	Dust may irritate skin and eyes.
Sensitization	May be slightly sensitizing (guinea pig)
Chronic toxicity	Low toxicity
Mutagenicity	No suspicion of human mutagenicity.
Carcinogenicity	Not carcinogenic (several species).
Reproduction toxicity	No teratogenic, not embryotoxic.
Note	Oral uptake of up to 9 g per day does not produce any serious toxic effects, however, even lesser quantities may cause diarrhea. ADI (Acceptable Daily Intake) 60 mg/kg Generally recognized as safe for human consumption.

12. Ecological Information

Inherent biodegradability	Inherently biodegradable
Ecotoxicity	Moderately toxic for fish (suspension) (rainbow trout) LC ₅₀ (96 h) 51 mg/L LC ₁₀₀ (96 h) 100 mg/L LC ₀ (96 h) 25 mg/L
Air pollution	Observe all national and local regulations.

13. Disposal Considerations

Waste from residues	Incinerate in qualified installation with flue gas scrubbing. Observe all national and local regulations regarding waste disposal.
---------------------	---

14. Transport Information

	Land transport (ADR/RID)	Sea transport (IMDG)	Air transport (ICAO/IATA)
UN-Number:	Not regulated	Not regulated	Not regulated
UN Proper shipping name:	Not regulated	Not regulated	Not regulated
Transport hazard Class:	Not regulated	Not regulated	Not regulated
Packaging group:	Not regulated	Not regulated	Not regulated
Environmental hazards:	Not regulated	Not regulated	Not regulated
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code	Not regulated	Not regulated	Not regulated

15. Regulatory Information

EU classification and labelling

R52/53

Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

S61

Avoid release to the environment. Refer to special instructions / safety data sheets.

16. Other Information

Use

Active pharmaceutical ingredient, food additive, cosmetic.
