|-----|------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 4.1 | <b>Description of first aid measures</b> |                                                                                                                                                                                                                                                                                                        |
|     | General information:                     | Immediately remove any clothing soiled by the product. In case of irregular breathing or respiratory arrest provide artificial respiration. Seek medical treatment. Symptoms of poisoning may even occur after several hours; therefore, medical observation for at least 48 hours after the accident. |
|     | After inhalation:                        | Remove to fresh air. Encourage patient to blow nose to ensure clear passage of breathing. If not breathing, give artificial respiration. If breathing is difficult, give                                                                                                                               |

Revision date 03/10/2024

|     |                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|-----|-----------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|     |                                                                                   | oxygen. Get medical attention.                                                                                                                                                                                                                                                                                                                                                                                                             |
|     | After skin contact:                                                               | Immediately flush skin with plenty of soap and water for at least 15 minutes. Remove contaminated clothing and shoes. Failure to treat burns can prevent wounds from healing. Flush skin and hair with running water (and soap if available). Seek medical attention in event of irritation.                                                                                                                                               |
|     | After eye contact:                                                                | Rinse opened eye for several minutes under running water. Then consult a doctor. Wash out immediately with fresh running water. Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids. If pain persists or recurs seek medical attention. Removal of contact lenses after an eye injury should only be undertaken by skilled personnel. |
|     | After swallowing:                                                                 | Rinse out mouth and then drink plenty of water. Do not induce vomiting; call for medical help immediately. Immediately give a glass of water. First aid is not generally required. If in doubt, contact a Poisons Information Centre (PIC) or a doctor.                                                                                                                                                                                    |
| 4.2 | <b>Most important symptoms and effect, both acute and delayed</b>                 | Risk of serious damage to eyes and corrosive to skin.                                                                                                                                                                                                                                                                                                                                                                                      |
|     | Information for doctor:                                                           | <ul style="list-style-type: none"> <li>Treat symptomatically and supportively.</li> <li>No known specific antidote.</li> </ul>                                                                                                                                                                                                                                                                                                             |
|     | <b>Indication of any immediate medical attention and special treatment needed</b> | Follow all the instructions mentioned in section 4.1.                                                                                                                                                                                                                                                                                                                                                                                      |

### SECTION 5: Firefighting measures

|     |                                                   |                                                                                                                                                                                         |
|-----|---------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5.1 | <b>Extinguishing media</b>                        |                                                                                                                                                                                         |
|     | Suitable extinguishing media:                     | <ul style="list-style-type: none"> <li>Foam.</li> <li>Dry chemical powder.</li> <li>Carbon dioxide</li> <li>Water spray or jet</li> </ul>                                               |
|     | Unsuitable extinguishing media:                   | Do not use strong oxidizers as extinguishing media, acids and alkali.                                                                                                                   |

|     | Additional information about design of technical facilities:            | <p>Safety shower and eye bath in close proximity to work areas.</p> <p>Local exhaust ventilation required.</p>                                                                                                                                                                                                 |                                     |        |                         |
| 8.1 | <b>Control parameters</b>                                               |                                                                                                                                                                                                                                                                                                                |                                     |        |                         |
|     | Ingredients with limit values that require monitoring at the workplace: | <b>Identification</b>                                                                                                                                                                                                                                                                                          | <b>Occupational exposure limits</b> |        |                         |
|     |                                                                         | Acetic acid                                                                                                                                                                                                                                                                                                    | OEL (8h)                            | 10 ppm | 25 mg/m <sup>3</sup>    |
|     |                                                                         | CAS: 64-19-7                                                                                                                                                                                                                                                                                                   | OEL (15 min)                        | 20 ppm | 50 mg/m <sup>3</sup>    |
|     |                                                                         | EC: 200-580-7                                                                                                                                                                                                                                                                                                  | OEL (15 min)                        | 15 ppm | 101.2 mg/m <sup>3</sup> |
| 8.2 | <b>Exposure controls</b>                                                |                                                                                                                                                                                                                                                                                                                |                                     |        |                         |
|     | General protective and hygienic measures:                               | Immediately remove all soiled and contaminated clothing. Keep away from foodstuffs, beverages and feed. Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin. Store protective clothing separately.                                                                           |                                     |        |                         |
|     | Respiratory protection:                                                 | In case of brief exposure or low pollution use respiratory filter device. In case of intensive or longer exposure use self-contained respiratory protective device. Use Particulate respirator in dusty conditions                                                                                             |                                     |        |                         |
|     | Protection of hands:                                                    |  <p>Protective gloves The glove material has to be impermeable and resistant to the product. Selection of the glove material depends on consideration of the penetration times, rates of diffusion and the degradation.</p> |                                     |        |                         |
|     | Material of gloves                                                      | Solvent-resistant gloves. As the product is a preparation of several substances, the resistance of the glove material cannot be calculated in advance and has therefore to be checked prior to the application.                                                                                                |                                     |        |                         |
|     | Penetration time of glove material                                      | The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed. Gloves should be discarded and replaced if there is any indication of degradation or chemical breakthrough.                                                                              |                                     |        |                         |
|     | Eye protection:                                                         | Tightly sealed goggles                                                                                                                                                                                                                                                                                         |                                     |        |                         |

## SECTION 10: Stability and reactivity

|      |                                           |                                                                                                                            |
|------|-------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|
| 10.1 | <b>Reactivity</b>                         | Stable at ambient temperature and under normal conditions of use.                                                          |
| 10.2 | <b>Chemical stability</b>                 | Stable under recommended storage conditions.                                                                               |
| 10.3 | <b>Possibility of hazardous reactions</b> | Hazardous reactions will not occur if stored under normal conditions.                                                      |
| 10.4 | <b>Conditions to Avoid</b>                | Excessive heat, Strong oxidizing agents, incompatible materials.                                                           |
| 10.5 | <b>Incompatible materials:</b>            | Avoid contact with strong acids, alkali or oxidizing agents.                                                               |
| 10.6 | <b>Hazardous decomposition products:</b>  | Carbon dioxide and carbon monoxide may form when heated to decomposition.<br>May also release toxic and irritating vapors. |

## SECTION 11: Toxicological information

|      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                                                                                                                                                                             |               |                                   |
