Eye Protection:

Use protection glasses.

FDS-002	Sweet Whey powder	January-2013	
---------	-------------------	--------------	--

9. Physical and chemical Properties :

Physical State:	Fine powder.
Color:	Cream - white.
Smell:	Typical.
Density:	500-600 g/l
pH (10%):	6-6,8
Moisture:	less than 5%
Soluble:	Parcially soluble in water.
Point of ignition:	> 250°C

10. Stability and reactivity :

Termic breakdown:

No risk, if stored / handled as indicated.

Dangerous reactions :

Explosion risk in case of dispersion in air of considerable amounts of powder.

Dangerous elements formed after termic breakdown:

Not known.

11. Toxicological information :

During adequate handling/ use of the product there are no harmful effects known, according to our experience and information. Only after long term contact with the product and this only in persons that are particularly allergic, there can be cases of cutaneous sensibility like dermatitis or pruritis.

12. Ecological Information :

Its discharge in water can be damaging to environment.

13. Considerations according to its elimination :

For elimination take into account the local or national regulations.
Do not pour into environment.

14. Information about transport :

It is considered "not dangerous product" according to transport regulations.
