

## Safety Data Sheet as per Globally Harmonized System (GHS)

### Phenoxyethanol P5

Version No. 7      Revised on: March 20, 2025

#### 1. IDENTIFICATION OF THE SUBSTANCE OR MIXTURE AND OF THE SUPPLIER

GHS Product identifier

Trade Name : Phenoxyethanol P5

INCI Name : Phenoxyethanol

CAS Number : 122-99-6

EC Number : 204-589-7

Recommended use of the chemical and restrictions on use

Use of the substance/mixture : Ingredient in Personal and Home Care products

Supplier's details : Galaxy Surfactants Limited  
C-49/2, TTC Industrial Area  
Pawne, Navi Mumbai, 400703, India  
Tel: +91-22-27615250/+91-22-39135500  
e-mail: [galaxy@galaxysurfactants.com](mailto:galaxy@galaxysurfactants.com)

Emergency phone number : For product information: +91-9867673376 / +91-9867613368  
(Language: English)  
For Incident (Spill, Leak, Fire, Exposure, or Accident)  
CHEMTREC (Day or Night): +1 703-741-5970 / 1-800-424-9300

#### 2. HAZARD IDENTIFICATION

**Classification of the substance or mixture:**

Acute oral toxicity Category 4; H302

Eye damage Category 1; H318

STOT-single exposure Category 3; H335

**GHS label elements, including precautionary statements**

Hazard pictogram:

Signal word: Danger

## Safety Data Sheet as per Globally Harmonized System (GHS)

### Phenoxyethanol P5

Version No. 7      Revised on: March 20, 2025

---

#### Hazard statement(s):

H302: Harmful if swallowed.

H318: Causes serious eye damage.

H335: May cause respiratory irritation.

#### Precautionary statement(s):

P261: Avoid breathing dust/fume/gas/mist/vapours/spray.

P264: Wash hands thoroughly after handling.

P270: Do not eat, drink or smoke when using this product.

P280: Wear protective gloves/protective clothing/eye protection/face protection.

P301+P317: IF SWALLOWED: Get medical help.

P304+P340: IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.

P305+P354+P338: IF IN EYES: Immediately rinse with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P317: Get medical help.

P330: Rinse mouth.

P501: Dispose off contents/container in accordance with local/regional/national/international regulations.

Other hazards which do not result in classification : Not known

### 3. COMPOSITION/INFORMATION ON INGREDIENTS

Chemical identity of the substance : 2-phenoxyethanol

Common name(s), Synonym(s) : Ethylene glycol monophenyl ether; Ethylene glycol phenyl ether; beta-Hydroxyethyl phenyl ether; Glycol monophenyl ether; 2-Phenoxyethyl alcohol; Ethanol, 2-phenoxy

CAS Number : 122-99-6

EC Number : 204-589-7

Concentration : 99.5% minimum

Impurities and stabilizing additives which are themselves classified and which contribute to the classification of the substance : Not known

#### 4. FIRST- AID MEASURES

Description of necessary first-aid measures

|                                                                                      |                                                                                                                                                                                                                                                                                                                                       |
|--------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Inhalation                                                                           | : If exposed to excessive levels of vapours /aerosol, remove to fresh air and get medical attention if cough or other symptoms develop                                                                                                                                                                                                |
| Skin contact                                                                         | : Immediately flush skin with water for at least 15 minutes while removing contaminated clothing and shoes. Obtain medical attention without delay, if necessary. Wash clothing before reuse. Safety shower should be located in immediate work area                                                                                  |
| Eye contact                                                                          | : Immediately flush eyes with running water; Keeping the eyelids open forcibly remove contact lenses, present, after the first 5 minutes, then continue flushing eyes for at least 15 minutes. Obtain medical attention without delay, preferably from an ophthalmologist. Eye wash fountain should be located in immediate work area |
| Ingestion                                                                            | : Rinse mouth thoroughly with water. If swallowed, seek medical attention. Do not induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person                                                                                                                                |
| Most important symptoms/effects, acute and delayed                                   |                                                                                                                                                                                                                                                                                                                                       |
| Inhalation                                                                           | : May cause respiratory irritation                                                                                                                                                                                                                                                                                                    |
| Eye contact                                                                          | : Causes serious eye damage                                                                                                                                                                                                                                                                                                           |
| Ingestion                                                                            | : Harmful, if ingested                                                                                                                                                                                                                                                                                                                |
| Indication of immediate medical attention and special treatment needed, if necessary |                                                                                                                                                                                                                                                                                                                                       |
| Treatment                                                                            | : Treat symptomatically                                                                                                                                                                                                                                                                                                               |

#### 5. FIRE- FIGHTING MEASURES

|                                            |                                                                                                                                                                                                                                                   |
|--------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Suitable extinguishing media               | : Dry chemical powder, water fog or fine spray, carbon dioxide and foam                                                                                                                                                                           |
| Unsuitable extinguishing media             | : Do not use direct water stream, which may spread fire                                                                                                                                                                                           |
| Specific hazards arising from the chemical | : During a fire, smoke may contain the original material in addition to combustion products of varying composition, which may be toxic and/or irritating. Combustion products may include and are not limited to: Carbon monoxide, Carbon dioxide |

---

## Safety Data Sheet as per Globally Harmonized System (GHS)

### Phenoxyethanol P5

Version No. 7 Revised on: March 20, 2025

Special protective equipment and precautions for fire-fighters : Wear positive-pressure self-contained breathing apparatus and protective fire-fighting clothing (includes fire-fighting helmet, coat, trousers, boots, and gloves). If protective equipment is not available or not used, fight fire from a protected location or safe distance

### 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures : Use personal protective equipment. Wash hands after exposure with the substance. Restrict unnecessary and unprotected personnel from entering the area

Environmental precautions : Prevent from entering into soil, ditches, sewers, waterways and/or groundwater. Contain contaminated water/ fire-fighting water. Do not discharge into drains/surface water/ground water

Methods and materials for containment and cleaning up : Steps to be taken if material is released or spilled: Small spill: Absorb with suitable absorbent material such as sand, vermiculite. Collect in suitable and properly labeled container. Large spill: Contain spilled material if possible. Pump into suitable and properly labeled containers. Dispose off absorbed material / collected material in accordance with regulations

### §7. HANDLING AND STORAGE

Precautions for safe handling : Follow general occupational hygiene such as wash hands before and after use. Do not eat, drink or smoke in work areas. Remove contaminated clothing. Avoid spill. Use appropriate personal protective equipment while handling the material. Follow safe procedures for loading and unloading of product

§Conditions for safe storage, including any incompatibilities : Store the material in a clean, dry place at 20-40°C away from direct heat and sunlight. In original sealed condition, when stored as suggested, shelf life of the product is 2.5 years. Once the container is opened in hygienic condition, consume the product as soon as possible. Hygienic conditions must be maintained during usage to avoid any contamination and keep the container tightly closed after use. When taken in ISO container, it is recommended to consume the material within one month's time after unloading in storage tank. Product solidifies, if stored below 14°C for prolonged time. If solidifies, it is recommended to heat the jacketed ISO containers with hot water or steam with 1.0-1.5 kg/cm<sup>2</sup> pressure to bring the temperature of product to 30-40°C. If the product freezes in IBC / HMHDPE carboys then

## Safety Data Sheet as per Globally Harmonized System (GHS)

### Phenoxyethanol P5

Version No. 7 Revised on: March 20, 2025

keep the same in hot room of 30-40°C (avoid direct heating)  
Stacking of HMHDPE carboy/GI drums: Palletized/  
non-palletized: 1+1, both while transport and during storage  
Stacking of IBC: 1+1, both while transport and during storage

Suitable packing materials : HMHDPE carboy, GI drums, IBC, ISO container  
Unsuitable packing materials : Mild steel

### 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

(Source: Based on GESTIS International Limit values Database via: <https://ilv.ifa.dguv.de/limitvalues/49104>, as on date 20.03.2025)

Biological limit values : Not known  
Appropriate engineering controls : Proper plant design, technical measures and working operations should minimize human exposure  
Individual protection measures, such as personal protective equipment (PPE) : Eye/face protection: Safety goggles  
Skin protection: Apron, rubber gloves, shoes  
Respiratory protection : Required when vapours/aerosols are generated

| Physical state                               | : Clear, low viscous liquid                                                                                                  |
| Colour                                       | : Colourless                                                                                                                 |
| Odour                                        | : Faint aromatic                                                                                                             |
| Odour threshold                              | : No data available                                                                                                          |
| pH (1% aqueous solution)                     | : 5.5 - 7.0                                                                                                                  |
| Freezing point                               | : 14°C                                                                                                                       |
| Initial boiling point and boiling range      | : 244.3°C (EU Method A.2/OECD Guideline 103)                                                                                 |
| Flash point                                  | : 126°C at 101.23 kPa<br>(EU Method A.9/ISO 2719:2002/ASTM D 93)                                                             |
| Evaporation rate                             | : No data available                                                                                                          |
| Flammability                                 | : Non flammable                                                                                                              |
| Upper/lower flammability or explosive limits | : Not applicable                                                                                                             |
| Vapour pressure                              | : 0.01 hPa at 20°C (EU Method A.4/OECD Guideline 104)                                                                        |
| Vapour density                               | : No data available                                                                                                          |
| Relative density                             | : 1.105 - 1.110 at 20°C                                                                                                      |
| Solubility(ies)                              | : Soluble in isopropyl palmitate, aqueous alkali,<br>glycerin, propylene glycol, alcohol<br>Water solubility: 24 g/L at 20°C |
| Partition coefficient: n-octanol/water       | : Log K <sub>ow</sub> : 1.2 at 23°C (EU Method A.8)                                                                          |
| Auto-ignition temperature                    | : 475°C (Guideline: DIN 51 794)                                                                                              |
| Decomposition temperature                    | : > 350°C (EU Method A.2/OECD Guideline 103)                                                                                 |
| Viscosity (Brookfield, LVT, #1, 12 rpm)      | : < 100 cP at 25°C                                                                                                           |
| §Explosive properties                        | : Not explosive                                                                                                              |
| §Oxidising properties                        | : Not oxidising                                                                                                              |

#### 10. STABILITY AND REACTIVITY

|                    |                                                                                                           |
|--------------------|-----------------------------------------------------------------------------------------------------------|
| Reactivity         | : No hazardous reactions, if stored and handled as prescribed (Refer Section 7)                           |
| Chemical stability | : Stable under normal ambient and anticipated storage and handling conditions of temperature and pressure |

---

## Safety Data Sheet as per Globally Harmonized System (GHS)

### Phenoxyethanol P5

Version No. 7      Revised on: March 20, 2025

|                                    |                                                          |
|------------------------------------|----------------------------------------------------------|
| Possibility of hazardous reactions | : Not anticipated when used or handled as prescribed     |
| Conditions to avoid                | : Sunlight, heat, flame and other sources of ignition    |
| Incompatible materials             | : Strong acids, strong bases and strong oxidizing agents |
| Hazardous decomposition products   | : Will not form, if stored or handled as prescribed      |

### 11. TOXICOLOGICAL INFORMATION

|                                                 |                                                                                                                                                            |
|-------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Acute oral toxicity (Rat)                       | : LD <sub>50</sub> : 1840 mg/kg bw (female)<br>(Equivalent or similar to OECD Guideline 401)                                                               |
| Acute dermal toxicity (Rabbit)                  | : LD <sub>50</sub> : > 2214 mg/kg bw<br>(Draft IRLG (Interagency Regulatory Liaison Group) Guidelines for Selected Acute Toxicity Tests (August. 1979))    |
| Acute inhalation toxicity (Rat) (Aerosol)       | : LC <sub>50</sub> : > 1000 mg/m <sup>3</sup> air (nominal)<br>(OECD Guideline 412)                                                                        |
| Skin corrosion/irritation (Rabbit)              | : Not irritating<br>(OECD Guideline 404)                                                                                                                   |
| Serious eye damage/irritation (Rabbit)          | : Irritating<br>(OECD Guideline 405)                                                                                                                       |
| Skin sensitization (Guinea pig)                 | : No sensitization<br>(OECD Guideline 406/EU Method B.6/EPA OPPTS 870.2600)                                                                                |
| Respiratory sensitization                       | : No data available                                                                                                                                        |
| Germ cell mutagenicity                          |                                                                                                                                                            |
| Mammalian Chromosome aberration test (in vitro) | : Negative<br>(OECD Guideline 473/ EPA OPPTS 870.5375)                                                                                                     |
| Mammalian Cell Gene Mutation Test (in vitro)    | : Negative<br>(OECD Guideline 476/EU Method B.17/EPA OPPTS 870.5300)                                                                                       |
| Bacterial reverse mutation assay (in vitro)     | : Negative<br>(OECD Guideline 471/EU Method B.13/14)                                                                                                       |
| Micronucleus assay (in vivo)                    | : Negative<br>(OECD Guideline 474/EU Method B.12/EPA OPPTS 870.5395)                                                                                       |
| Carcinogenicity                                 | : Carcinogenicity not expected<br>Toxicity: Rat (Oral): NOAEL: 249 mg/kg bw/day<br>Toxicity: Mouse (Oral): NOAEL: 468 mg/kg bw/day<br>(OECD Guideline 451) |
| Reproductive toxicity                           | : Not classified                                                                                                                                           |
